ABSTRACT

CHAPTER 01: INTRODUCTION

- 1.1 Background
- 1.2 Problem Definition
- 1.3 Aims and Objectives
- 1.4 Scope of the Project

CHAPTER 02: SYSTEM REQUIREMENTS & METHODOLOGY

- 2.1 Requirement Analysis
- 2.2 System Design

CHAPTER 03: IMPLEMENTATION

- 3.1 Messaging Engine Module (Custom Kafka-like Broker)
- 3.2 API Gateway Module (Javalin-based REST Server)
- 3.3 Log Storage Module (File-Channel & Append-Only Logs)
- 3.4 Distributed Coordination Module (Zookeeper Integration)
- 3.5 Frontend Chat Dashboard Module
- 3.6 Tiered Storage Module (Cloud Archival Simulation)

CHAPTER 04: TESTING AND RESULTS

- 4.1 Unit Testing
- 4.2 Integration Testing
- 4.3 System Testing
- 4.4 Validation
- 4.5 Results

CHAPTER 05: CONCLUSION & FUTURE SCOPE

- 5.1 Conclusion
- 5.2 Future Scope

REFERENCE

BIBLIOGRAPHY

LIST OF FIGURES

1. **Figure 2.1: System Architecture of the Proposed Distributed Messaging System**
2. **Figure 2.2: Data Flow Diagram of the Messaging System**
3. **Figure 2.3: Block Representation of the Distributed Messaging System**
4. **Figure 3.1: Message Processing Flow in the Messaging Engine**
5. **Figure 3.2: Log Storage and Message Persistence Workflow**
6. **Figure 3.3: Zookeeper-Based Coordination and Leader Election Process**
7. **Figure 4.1: Frontend Chat Interface Showing Real-Time Message Exchange**
8. **Figure 4.2: API Response Showing Successful Message Processing**
9. **Figure 4.3: Log Storage Structure Showing .log and .index Files**
10. **Figure 4.4: Zookeeper Coordination Showing Active Nodes and Metadata**
11. **Figure 4.5: System Execution Showing Backend Server Logs**

LIST OF TABLES
